

3rd November, 2016

Dear Business Partner,

Please be informed that due to unforeseen circumstances the Steam Cracker 1 unit of MOL Petrochemicals didn't start up after maintenance. As a consequence **MOL Petrochemicals Co. Ltd. declares force majeure** on its PE and PP supplies with immediate effect, valid till further notice.

Our efforts are focused to minimize the impact on customers. Nevertheless due to unavailability of feed for the polymer plants at the site we are forced to introduce severe **volume restrictions for all PE supplies and limitations/delays for several grades in PP.**

Due to the impact of steam cracker outage on the overall propylene balance, limitations and delays on several PP Homo grades from Slovnaft a.s. are to be expected as well.

Respective sales representatives will be in contact with You to review the impact on products You purchase.

As soon as we have further information about the SC1 startup, our colleagues will contact you and provide details on the production schedule and material availability.

Yours sincerely,

Peter Haltenberger

Group Petrochemicals S&O Director
